Higher Diploma in Science (Software Development)

Work Placement Alternative Project

Andrei Drynov (G00411287)

Summary

I created a GitHub repository containing a series of sections that document and showcase projects from each module / subject I studied as part of my **Higher Diploma in Computer Science** programme at Atlantic Technological University in 2022:

- Agile Software Development
- Computer Architecture and Technology Convergence
- Computational Thinking with Algorithms
- Database Design & Development
- Mobile Applications Development
- Network Technologies
- Object Oriented Software Development (2 semesters)
- Operating Systems and Cloud Computing
- Web Applications Development

The URL of the GitHub repository is as follows: https://github.com/adrynov/adrynov.github.io

The dedicated web site is at https://adrynov.github.io/

Each repository section contains a README explaining what is in the repository and how (in the case of code-based projects) to get the code running, a gitignore file so that unnecessary files don't get added to the repository, and a LICENSE file.
